A statistical approach to the behavior of the variable quality is a pre-requisite to the adoption of SQC technique and this is done by drawing and analyzing sample at regular interval of time or space or any production sequence. If a large number of sample is taken, the results can be grouped in the form of a frequency distribution or histogram.

Figure 14 is a generalised diagram for composting organic sludges. Dewatered cake is mixed with either an organic amendment (e.g., dried manure, straw, or sawdust) or a recoverable bulking agent (e.g., wood chips) to reduce the unit weight and increase air voids. Finished compost may also be recycled and added to the wet cake.
