House of Leaves, by Mark Z. Danielewski Put simply, House of Leaves is one of the most frightening books ever written. From a fairly standard horror premise (a house is revealed to be slightly larger on the inside than is strictly possible) Danielewski spins out a dizzying tale involving multiple unreliable narrators, typographic mysteries, and looping footnotes that manage to drag the reader ...

Digital circuits. The parametron was a logic circuit element invented by Eiichi Goto in 1954. It was a digital computer element. Parametrons were used in Japanese computers from 1954 to the early 1960s, such as the University of Tokyo's PC-1 built in 1958, due to being reliable and inexpensive, but were ultimately surpassed by transistors due to differences in speed.
