Medical Ethics A Very Short

Medical ethics is an applied branch of ethics which analyzes the practice of clinical medicine and related scientific research. Medical ethics is based on a set of values that professionals can refer to in the case of any confusion or conflict. These values include the respect for autonomy, non-maleficence, beneficence, and justice. Such tenets may allow doctors, care providers, and families ...

Nurses earn a record 89% very high/high score for their honesty and ethics this year, four percentage points greater than their prior high, last recorded in 2019. Medical doctors' rating has improved even more in the past year, rising 12 points to 77% and exceeding the previous high of 70% found in 2011 and 2012.

U.S. Ethics Ratings Rise for Medical Workers and Teachers

Abortion is largely accepted even for reasons that do not have anything to do with the fetus' health. By showing that (1) both fetuses and newborns do not have the same moral status as actual persons, (2) the fact that both are potential persons is morally irrelevant and (3) adoption is not always in the best interest of actual people, the authors argue that what we call 'after-birth ...

The furor over the "God Committee" had barely subsided when successes in organ transplantation evoked similarly difficult, value-laden questions about the procurement and distribution of the scarce resource of solid organs. Jonsen AR. A Short History of Medical Ethics. New York, NY: Oxford University Press; 2000.

Why Did Hospital Ethics Committees Emerge in the US ...

Legally, the case was very straightforward. Under English law, when a patient is not competent to make decisions, they must be made on his behalf, in his best interests. Treatment can be provided only if it serves those interests. "Best interests" generally means medical best interests, but the patient's values and beliefs also count.

1 Every art and every inquiry, and similarly every action and pursuit, is thought to aim at some good; and for this reason the good has rightly been declared to be that at which all things aim. But a certain difference is found among ends; some are activities, others are products apart from the activities that produce them. Where there are ends apart from the actions, it is the nature of the ...
