...

A Fellowship is the period of medical training, in the United States and Canada, that a physician, dentist, or veterinarian may undertake after completing a specialty training program (residency). During this time (usually more than one year), the physician is known as a fellow. Fellows are capable of acting as an attending physician or a consultant physician in the specialist field in which ...

The USMLE-Step 2-CK ("Clinical Knowledge") is the nine-hour-long multiple-choice portion of the second part of the United States Medical Licensure Examination. It assesses clinical knowledge through a traditional, multiple-choice examination. In contrast to the USMLE Step 1, the focus is much more on clinical application of medical knowledge. It assesses the ability to apply medical knowledge ...

Among the key players in the neurological revolution of the early 19th Century, few may claim as much lasting relevance as Jean-Martin Charcot. Lending his eponym to phenomena such as Charcot's Joint (diabetic arthropathy), Charcot's Triad (acute cholangitis) and most notably Charcot's Disease (ALS), the French physician is widely considered to be a progenitor of modern neuroscience and ...
