Graphite prices started to recover in 2005 and with average growth rates of 5% per annum over the past decade. They are currently well over USD\$1,300/t with premium product rumoured to be selling at up to USD\$3,000/t as the supply of large flake, high carbon graphite is tightening.

Graphite 101 | Focus Graphite

Flake-graphite is probably the most familiar of the natural graphite materials. Most people are familiar with the finely powdered graphite used as a lock lubricant, or the “lead” in pencils. Both of these products typically contain flake graphite. As the name implies flake graphite has a distinctly flaky or platy morphology.
