If your inventory costs are going up, or are likely to increase, LIFO costing may be better, because the higher cost items (the ones purchased or made last) are considered to be sold. This results in higher costs and lower profits. If the opposite is true, and your inventory costs are going down, FIFO costing might be better.

Inventory Methods - Which is Better?

It is very common to use the FIFO method if one trades in foodstuffs and other goods that have a limited shelf life, because the oldest goods need to be sold before they pass their sell-by date.. Thus the first-in-first-out method is probably the most commonly-used method for small businesses. 2. The
